**“CHAMPIONSHIP DOUBLE FIGURE 8
AUTO RACING”**

Friday, September 11th, 2009 at 7:30 pm

TOTAL PURSE \$1,900

JM Productions developed this form of action racing by using compact cars to enhance excitement for both drivers and spectators. Utilizing smaller, lightweight cars takes on all the excitement of a full-sized Figure “8” without likely danger to the drivers. Speeds average between 5 and 15 miles an hour and only 5 to 8 cars are allowed at a time. Unlike the traditional brute-force demo, in this event it is your ability to **out-think** and **out-maneuver** the other driver that makes you the **WINNER!** Because of its challenge, drivers all over are switching to **FIGURE 8 RACING**. With strict guidelines/rules and the help of the drivers, we have made this race fun and fair for all!

PROGRAM OF EVENTS

DOUBLE FIGURE 8 QUALIFYING EVENTS #1-#8: In each of these events, the “Winner” (first car to cross the finish line after a pre-determined number of laps), will receive a trophy, \$50, and will qualify to run in Championship Event #9.

DOUBLE FIGURE 8 CHAMPIONSHIP EVENT #9: Open to the 8 drivers and their cars who qualified in events #1 through #8. The “Winner” will receive the Championship Trophy and \$1,000.

DEMOLITION DERBY CHAMPIONSHIP EVENT #10: Open to all drivers and their Figure 8 cars who competed in events #1 through #8. The “Winner,” (last car running) will receive \$500 and the Championship Trophy.

JM Productions, Inc. Double Figure 8 Rules will apply with the following changes:

1. Battery may be moved to any reasonable position in the car, but must be securely fastened to the car and must be covered with a suitable shield.
2. NO inside gas tank permitted in Figure 8 cars.

**WORLD'S LARGEST DEMOLITION DERBY
2009 HEBRON HARVEST FAIR
INSIDE FUEL TANK OPTION for the DEMOLITION DERBY ONLY!**

JMP has recommended stock fuel tanks for over 40 years, based on our experience of overall safety.

(All NASCAR Divisions Have Outside Fuel Tanks)

An alternate fuel tank **MAY** be installed with the following provisions adhered to:

- a) The stock fuel tank **must** be removed from the car if you are installing an inside tank.
- b) The car must use an approved type of portable fuel tank. A fuel tank used with outboard marine engines is acceptable.
- c) No stock tanks will be permitted inside the car. If you have a plastic marine tank, it must be placed in a solid steel case!
- d) The tank must be mounted on a solid, flat surface located directly above the rear axle.
- e) The tank must be securely mounted to the car body by at least two steel straps. **NO** rubber tie-downs permitted!
- f) The mounted fuel outlet fitting on the marine tank cannot be changed.
- g) The tank will not be allowed if fuel runs out when the outlet line is disconnected or when the tank is inverted.
- h) If any gas is spilled in your car, it will not be permitted to run.
- i) The fuel line must run under the floor pan to the fuel pump by using your original gas line or a new rubber hose.
- j) Fuel pump must shut off with ignition switch.
- k) No more than 3 gallons of gas is permitted.
- l) The rear seat cushion support brackets and all areas designated with an “X” in diagram 2 (below) must be covered with sheet metal or aluminum (firewall) to minimize fumes from entering the driver’s compartment from the trunk area.
- m) Station wagons must run with a stock tank in the stock position.

JM Productions does not imply or guarantee safety. We believe that when a gas tank leaks fuel or fumes, it is safer for them to leak on the track rather than in the car.
